

Design and build furniture for our new Centre for Green Change!

Calling all designers, furniture makers, and carpenters: We need your help to fabricate furnishings for the future Centre for Green Change, an innovative environmental education and community engagement hub in Toronto's Jane-Finch neighbourhood. Our vision is to create pieces that are inspired by our diverse community and incorporate existing, recycled, or reclaimed materials.

We have been busy generating ideas with local residents, but are now seeking some additional expertise to assist a group of youth with the construction of three to five pieces.

If you're interested in getting involved, please contact Clara at claras@janefinchcentre.org or 416-663-2733, ext. 235.
